**Forecast for Thursday 27 Jul 2023**

**Weather:** Damp and murky with persistent rain and drizzle, perhaps heavy for a time around dawn. Conditions will brighten up and become drier but it will be slow with an ongoing risk of showers or pockets of drizzle, and the odd chance of a heavier burst during the afternoon. Becoming generally dry by the evening though largely cloudy skies persisting.

**Chance of cloud-free hill tops above 600m:** 10% becoming 60% during the afternoon, reducing to 30% through the evening.

**Low Cloud and visibility:** Poor visibility at height, with cloud as low as 200-300m, but very poor in any spell of rain or drizzle. The cloud will lift and break but the highest hills will never remain free of cloud for very long, particularly in the west of the park. Becoming mediocre to good by the afternoon but rather hazy air persisting with visibilities quickly dropping in any further drizzly showers.
